

Enchantment Phono

Price

\$2,500

Function

High resolution LP playback with turntable setup support.

Available Modules

Single Ended Phono with 8 loading options

I2V Phono with 8 loading options

Battery monitoring, microprocessor controlled

Turntable speed monitoring, microprocessor controlled

Left and Right signal level monitoring, microprocessor controlled

Signal activated hour meter, microprocessor controlled

Interface

One TFT screens with custom color options

Push buttons

Power

36 watts LIPO power supply

20 hours run time

Chassis

5mm 3D printed clam shell

5.75" wide by 4.5" deep by 3" tall

1 pound 9 ounces

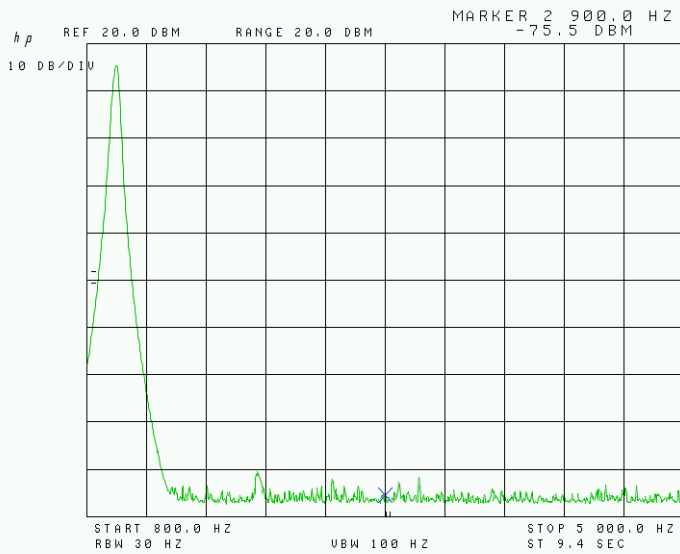

Distortion

The signal generator supplying the 1kHz sine wave measures .0005%. Each spectrum plot is based on a 1 volt rms signal.

Signal Source

The signal source is set at 1 volts and measures .0005%

RCA Out

The distortion measures .026%
